DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 21-26, drawn to a method of treating B-cell lymphoma comprising the administration to a subject having B-cell lymphoma, a multivalent vaccine comprising at least two recombinant heavy chain variable regions, classified in class 424, subclass 141.1.
 - II. Claims 27-32, drawn to a method of treating B-cell lymphoma comprising the administration to a subject having B-cell lymphoma, a multivalent vaccine comprising at least two recombinant light chains variable regions, classified in class 435, subclass 343.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions differ one from the other because the products used to treat lymphoma patients have different chemical structures, which will have different functional effects on the treatment of the patient.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 1642

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher H Yaen whose telephone number is 703-305-3586. The examiner can normally be reached on Monday-Friday 9-5.
